Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Acknowledgment

1. This Office Action is responsive to the Amendment filed on 6/11/2007.

Accordingly, claims 1-46 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 37-41 and 43-46 are rejected under 35 U.S.C. 102(e) as being anticipated by Kroeger et al (US 6,345,377; art cited by applicant).

Regarding claims 37-41 and 43-46, Kroeger, as shown in figures 3-5, teaches a method for interleaving bits of a digital signal in a digital audio broadcasting (DAB) system comprising writing bits into matrix in the form of partitions and reading bits from the matrix and mapping the partitions into frequency partitions (carriers) for OFDM communications. See also column 3, lines 60-65 and column 6, line 58 to column 10, line 28.

Claim Rejections - 35 USC § 103

4 The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5 Claims 1-36 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kroeger et al (US 6,345,377; art cited by applicant) in view of Partyka (US 5,659,580; art cited by applicant).

Regarding claims 1-36 and 42, Kroeger teaches all subject matter claimed except for at least one of the writing and reading follows non-sequential addressing scheme. However, Partyka, from the same field of endeavor, teaches interleaver, which reads the data from the interleaver, which follows the non-contiguous (non-sequential) addressing scheme. See Partyka: column 2, lines 27-42 and column 4, lines 38-59. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Kroeger et al by using the addressing scheme for the interleaving as taught by Partyka so as to simplify the implementation of the interleaver and increase the reliability and the speed of the interleaver circuit. Partyka: column 2, lines 27-31.

Response to Arguments

6. Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
